

ComponentAbstract

```
classDiagram
    class ComponentAbstract
    class ErrorMessageComponent
    class UserRegisterComponent
    ErrorMessageComponent --|> ComponentAbstract
    UserRegisterComponent --|> ComponentAbstract
```

The diagram illustrates a class hierarchy. At the top is the 'ComponentAbstract' class. Below it are two subclasses: 'ErrorMessageComponent' on the left and 'UserRegisterComponent' on the right. A horizontal line connects the two subclasses, with an upward-pointing arrow from the center of this line to the 'ComponentAbstract' class, indicating that both subclasses inherit from the abstract class.

ErrorMessageComponent

UserRegisterComponent
